EXECUTIVE SUMMARY

Rising computer science senior with IT operations and development experience, skilled in Python, Java, C, and JavaScript with hands-on project experience in full-stack web development and applied cryptography. Seeking to apply technical skills in software engineering, web development or security focused roles.

EDUCATION

University of Maryland

College of Computer, Mathematical, and Natural Sciences

Bachelor of Science, Computer Science, Honors College (Advanced Cybersecurity)

Global Terrorism Studies Minor

College Park, MD

Cumulative GPA: 3.47

Expected: May 2027

Relevant Coursework: Algorithms, Object Oriented Programming, Counter-Terrorism, Countering Violent Extremism, Business Writing, Communication in Cyber, Statistics, TCP/IP, Network Security, Human Computer Interaction

SKILLS

Skills: Python, Java, Microsoft Office Suite, Google Suite, C, OCaml, Unix, Bash, x86_64 Assembly, Static and Dynamic Analysis (Reverse Engineering), HTML, CSS, JavaScript

PROFESSIONAL EXPERIENCE

Giant Food

Cashier/Grocery Clerk

Burtonsville, MD

Mar. 2022 — Present

- Maintain balanced cash drawer, ensuring accurate accounting at end of each shift
- Resolve customer complaints professionally, leading to improved customer relations and loyalty
- Train new hires on sales processes, customer service and POS systems

The National Consortium for the Study of Terrorism and Responses to Terrorism

Wargaming Social Complexity and Asymmetric Threats Internship

College Park, MD

Jul. 2025 — Aug. 2025

- Collaborated in weekly team meetings focused on simulation design and research, resulting in a final presentation
- Developed a Python script to support semantic analysis by applying vector search methods, gaining hands-on experience in natural language processing (NLP) workflows
- Contributed to program design, validation, and testing while developing applied intelligence analysis skills

Potomac Electric Power Company

Student Intern

Washington D.C.

Jul. 2022 — Sept. 2022 & Jul. 2023 — Sept. 2023

- Managed the onboarding process by configuring VPNs and hardware for new hires while maintaining asset inventory of all IT equipment using Microsoft Excel
- Provided Level 1 & 2 support for all business technology under supervision and direction of IT lead

Academic Projects

Kitchen Kompanions

Introduction to Human Computer Interaction - Spring 2026

- Group design and implementation of a mobile app prototype for managing household kitchen inventory, shopping lists, and cooking.
- Utilized JavaScript to dynamically render HTML elements and manage category filtering, favoriting and shopping list integration of recipe feature
- Developed low-fidelity paper prototypes and conducted user testing to improve user flow within the medium-fidelity prototype.

Build it Break it

Network Security - Fall 2025

- Group development of ATM/Bank system in C utilizing regular expressions, AES-256-GCM and RSA encryption via OpenSSL EVP API to mitigate rainbow table, command injection, and buffer overflow attacks
- Identified and exploited plaintext storage vulnerabilities in a team's ATM/Bank system by tampering with the router to intercept and inject traffic, successfully retrieved user balances without card or PIN access

Honeypot Research Project

Applied Cybersecurity Foundations II - Fall 2025

- Semester long group project based on the research question: "How does attacker behavior vary based on the targeted University of Maryland department?"
- Implemented Unix scripts to manage Ubuntu container lifecycles, initiate Man-in-the Middle (MITM), and MITM log processing
- Utilized pandas and SciPy for data formatting, processing and visualization of ~1000 weekly attacker sessions
